

PARCEL FORCE - TEMPLEBOROUGH, ROTHERHAM

CEF Ellesmere Port Branch

The new 14,039 square metre Parcel Force distribution and warehouse facility in Templeborough, Rotherham, has recently installed a large range of Gripple® suspension products. Gripple® is the market leader of wire joiners and tensioners for the agriculture market and wire rope suspension solutions for the construction market. The clean lines and uncluttered layout of these unique British

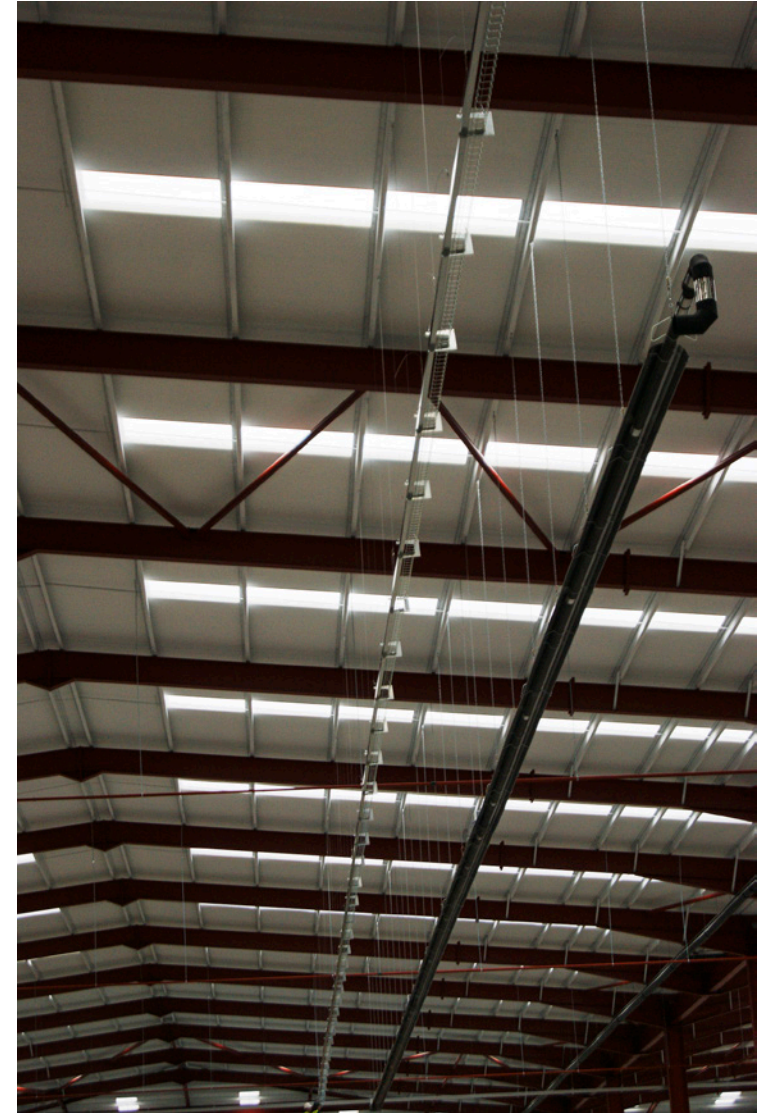

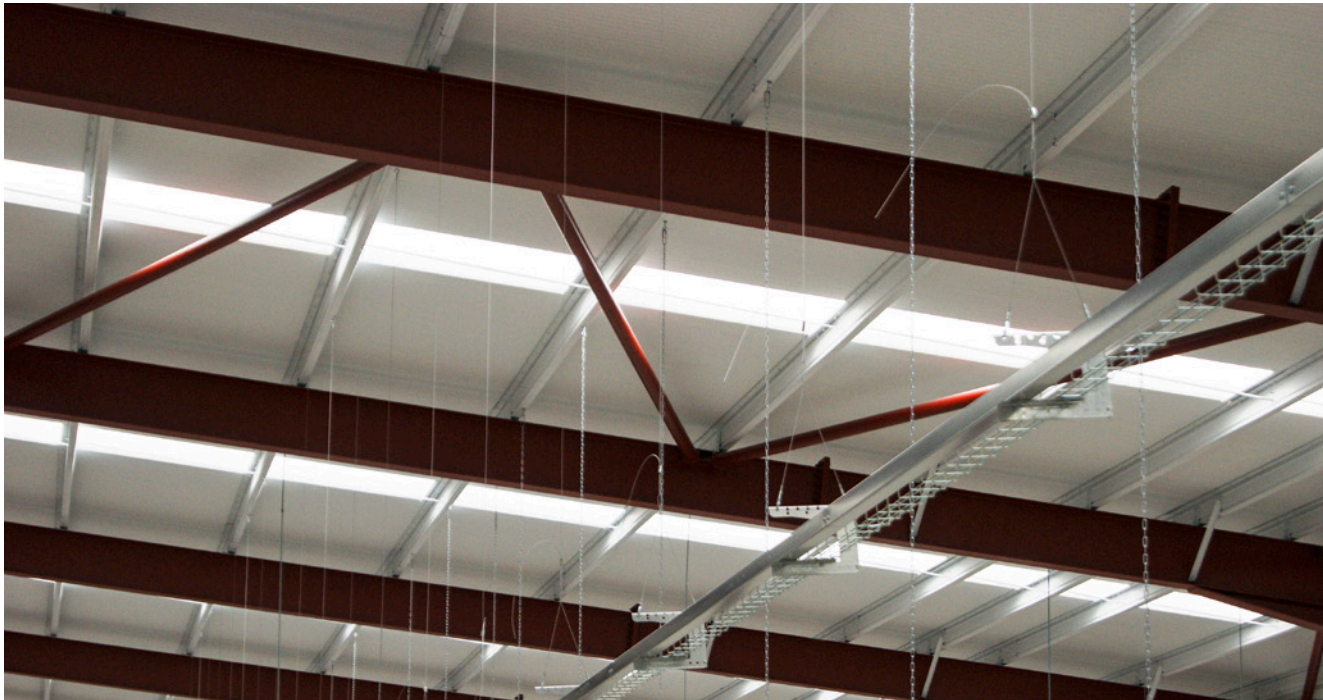

products are shown in the photographs here, but you'll have to try hard to see them. They really do disappear into the background, would you believe this warehouse is primed and ready for the electrical installation. CEF in partnership with F4P and Gripple® save you time, effort and costs. Parcel Force are planning to fit Gripple® to more of their premises in future.
