

ABOUT

The Telescopic Pole has a specialised polyester resin baked enamel coating for durability. At 5.6 metres in length when fully extended, it is ideal for quick cable routing. The product adds another way to route cable, and will be appreciated by electricians involved with larger size projects. The pole is considerably more rigid than rod or coiled based products, giving the installer far more control and greater accuracy over longer reaches.

APPLICATION

• Route • Retrieve

SPECIFICATION

Product Name	Telescopic Pole
Item Code	SR-TP
Length	5.6 metres (fully extended)
Attachments	N/A

CONTENTS

- 1 x Telescopic Pole & Platform
- 1 x Prong
- 1 x Flat Bullet
- 1 x Tuff Hook
