

827 T i Kraftform Turbo blade holding handle, 9 x 125 mm

Kraftform Kompakt Turbo

EAN:	4013288214607	Size:	150x60x46 mm
Part number:	05057481001	Weight:	195 g
Article number:	827 T i Kraftform Turbo	Country of origin:	CZ
		Customs tariff number:	84661038

- The construction of the Kraftform Turbo allows a quadruplication of the speed when manually screwdriving, especially with metric threads - purely mechanically (without battery)
- Activation and deactivation of the turbo function by a simple push of a button
- The fixable universal gear allows powerful screwdriving and easy fine adjustments
- Robust, maintenance-free gear made of steel (maximum torque 14 Nm)

Many users would like to be able to carry out screwdriving processes faster without compromise. With a screwdriver that is precise, allows powerful screwdriving, and is much faster than a conventional screwdriver. A part time universal gear is the solution: integrated in the handle of the screwdriver, it significantly increases the working speed, especially with metric threads. The Kraftform Turbo accelerates the screwdriving in a purely mechanical way. The turbo function can either be switched on or off by pressing a button. Turning it off is recommended at increasing torque moments, or for fine adjustments and final tightening or loosening of a high torque screw. The robust steel design is maintenance-free and ensures a long product life. Exclusively for Wera VDE interchangeable blades.

Kraftform Kompakt Turbo

Faster screwdriving

The construction of the Kraftform Turbo allows a quadruplication of the speed when manually screwdriving, especially with metric threads – purely mechanically, without electricity!

With and without Turbo

The Turbo function can either be switched on or off by pressing a button. For initial loosening and final tightening at increasing torque moments (or fine torque adjustment) of screws the Turbo function is disabled. For free running screws the Turbo function is enabled.

Robust, maintenance-free gear made of steel

The robust steel design is maintenance-free and ensures a long product life.

Handle/interchangeable blade system

With its 9 mm mounting, the Kraftform Turbo is suitable for all Wera Kraftform Kompakt VDE interchangeable blades. The "holder/interchangeable blade system" stands for flexible working with many screw profiles.

Kraftform Kompakt

The Kraftform Kompakt series stands for low weight, low space requirements and high flexibility due to interchangeable blades.

Kraftform

The basic idea for the prototype of the Kraftform handle – that the hand should dictate the design – has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.
